TI - New fusion protein for treating disease e.g. diabetes comprises an
albumin fused to a therapeutic protein

IW - NEW FUSE PROTEIN TREAT DISEASE DIABETES COMPRISE ALBUMIN FUSE
THERAPEUTIC PROTEIN

PA - (HUMA-N) HUMAN GENOME SCI INC

PN - WO0177137A1 20011018 DW200201 C07H21/04 Eng 000pp

IC - C07H21/04

AB - WO200177137 NOVELTY - An albumin fusion protein (I) comprising a
therapeutic protein X and albumin comprising a fully defined 585 amino
acid sequence (S1) given in the specification, is new.

- DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the
following:

- (1) an albumin fusion protein (II) comprising a therapeutic protein X
and a fragment or variant of S1 having albumin activity;
- (2) an albumin fusion protein (III) comprising a fragment or variant
of therapeutic protein X and an albumin having S1;
- (3) an albumin fusion protein (IV) comprising a protein X, fragment or
variant inserted into an albumin comprising S1;
- (4) a kit comprising the protein;
- (5) a nucleic acid molecule comprising a polynucleotide sequence
encoding (I)-(IV);
- (6) a vector comprising the nucleic acid molecule; and
- (7) a host cell comprising the nucleic acid molecule.

- ACTIVITY - Cytostatic; antiinfertility; antiinflammatory; antiulcer;
immunomodulator; anti-HIV; antidiabetic; hemostatic; nootropic;
neuroprotective; antiparkinsonian; antimicrobial; neuroleptic;
osteopathic; antiarthritic.

- MECHANISM OF ACTION - gene-therapy; vaccine.

- USE - The protein is useful for treating a disease or disorder that
may modulated by therapeutic protein X (claimed). The albumin extends
the shelf-life of protein X, and may increase its biological in
vitro/in vivo activity (claimed). The protein is useful for treating
and diagnosing e.g. cancer, reproductive disorders, digestive
disorders (e.g. Crohn's disease, ulcerative colitis), immune disorders
(e.g. AIDS), endocrine disorders (e.g. diabetes), hematopoietic
disorders, neural disorders (e.g. Alzheimer's, Parkinson's,
Creutzfeldt-Jacob disease, encephalomyelitis, meningitis,
schizophrenia) and a connective disorder (e.g. osteoporosis,
arthritis).
